

**Developing common welfare
The state between community and global society**

Der Staat zwischen
Gemeinschaft
Gemeinwohl
und entwickeln
Weltgesellschaft

Program

5th Austrian Conference on Development

Krems

October 14-16, 2011

The 5th Austrian Conference on Development will take place in Krems from Friday, October 14, to Sunday, October 16, 2011. It will essentially deal with questions related to state, community and global society. What kind of state do we need to guarantee a good live for everybody? How do we develop common welfare on all levels? The Conference on Development wishes to link and produce knowledge to enable an integrated perception of development.

Who will attend the conference?

The conference addresses experts from the developmental sector, practitioners as well as researchers, who want to look beyond their own disciplines, promote exchange and create new alliances. It's also open to all persons interested in development politics. Concretely, participants will be...

...people, who work in development organisations, in the public sector and in the private / NGO / church sector.

...people, who belong to organisations of the development sector, or to other social organisations.

...people, who are interested in questions of development politics: students from different universities, teachers, activists ...

...opinion leaders in media and politicians.

Number of participants: approx. 300 - 400.

What do we aim at with this conference?

1. To open new spaces for networking.
2. To provide free space for critical thinking, to reflect about the contradictions between individuals and structures.
3. To develop a new concept of development that gives answers to the contradictions of the mainstream system. For doing so, it is necessary to promote knowledge for better orientation in our confusing times and to develop political visions.
